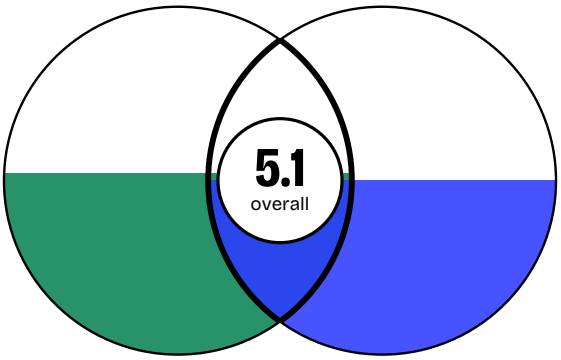
Evaluation sheet

investify

Prepared for Ahmad Zahid | Stage: Built an MVP | 24 October 2026



Pakistan 5.2 **Global 5.0**

Needs validation: Validate further before building

Further validation is needed to refine the business model, confirm the security measures, and gain regulatory clarity to ensure market readiness.

The idea

Investify aims to simplify and secure investment processes for people in Pakistan who are currently not well-versed in investments.

Pakistan 5.2/10 Needs validation

Investify addresses a significant need in Pakistan where many are unfamiliar with investing but aspire to do so. While there's competition, the potential market is large given the low current penetration.

Global 5.0/10 Needs validation

Globally, the investment facilitation space is mature with strong competitors. This idea has universal appeal but faces high market entry barriers.

Biggest strength

Potential to tap into an under-served market segment in Pakistan that lacks investment knowledge.

Biggest risk

Security concerns and regulatory hurdles could impede trust and adoption both locally and globally.

Priority actions

1. Conduct deeper market research to understand target customer behavior and needs.
2. Develop a robust legal and regulatory compliance plan for financial services in Pakistan.
3. Design and test security features to build user trust.
4. Formulate a clear marketing and distribution strategy.
5. Outline a detailed, scalable financial model tailored to local and global markets.

Pakistan market: 5.2/10, Needs validation

#	Criterion	Score	Why
1	**Market Demand & Problem Severity**	7/10	High potential as many Pakistanis lack investment knowledge but desire financial growth.
2	**Total Addressable Market & Reachable Demand**	6/10	Sizeable market potential, but effective reach will require strong marketing and education.
3	**Purchasing Power & Willingness to Pay**	5/10	Limited purchasing power, though willingness to pay exists if risk is mitigated.
4	**Revenue Model & Local Unit Economics**	4/10	Unclear unit economics and revenue model; further analysis needed in local context.
5	**Competition & Existing Alternatives**	5/10	Competing with existing platforms like Sarmaya and offline methods.
6	**Digital & Physical Infrastructure Readiness**	5/10	Moderate readiness; improves with digital adoption but infrastructure challenges exist.
7	**Regulatory, Legal & Tax Feasibility**	4/10	Financial services regulations are complex and can be stringent for new entrants.
8	**Supply Chain & Operational Feasibility**	5/10	Operational feasibility is unclear; reliance on external parties adds complexity.
9	**Trust, Adoption & Customer Behavior**	6/10	Adoption possible, but trust depends on security assurances and brand reliability.
10	**Scalability, Resilience & Local Execution**	5/10	Scalability plausible but affected by potential economic and policy fluctuations.

Global market: 5.0/10, Needs validation

#	Criterion	Score	Why
1	**Global Market Size & Growth Potential**	6/10	Large market but dominated by established players; growth possible in underserved regions.
2	**Global Problem-Solution Fit**	6/10	Problem recognized globally, but the solution must compete in a crowded field.
3	**Competitive Advantage & Defensibility**	4/10	Numerous strong global competitors make differentiation difficult.
4	**Global Business Model & Profitability**	5/10	International pricing can work if differentiated; profitability hinges on competitive fees.
5	**Scalability & Replicability**	5/10	Replication possible, but cultural and regulatory differences add complexity across markets.
6	**International Regulatory & Legal Compatibility**	5/10	Regulatory compliance essential and varies greatly across countries, posing challenges.
7	**Localization & Cross-Cultural Fit**	4/10	Significant localization needed; financial tools require cultural adaptation to gain trust.
8	**Customer Acquisition & Distribution Potential**	5/10	Distribution depends on cost-effective digital channels and strong global partnerships.
9	**Capital Requirements & Funding Attractiveness**	5/10	Requires substantial capital to compete; uncertain if it attracts sufficient investor interest.
10	**Market Entry Risk & Long-Term Resilience**	5/10	High entry risk without established niche or strong differentiation; resilience needed to adapt.

How to read this sheet. An AI agent scored each criterion from 1 to 10 using the FoundersLens evaluation framework (ten criteria for Pakistan, ten for the global market). A market score is the average of its ten criteria and the overall score is the average of the two market scores. Bands: 8 and above Strong, 6.5 to 7.9 Promising, 5 to 6.4 Needs validation, 3.5 to 4.9 High risk, below 3.5 Weak. Scores are directional judgements, not verified market data.
